

Grind Master delivers Seminar on NANOFINISH - Microfinishing and Superfinishing of Next Gen Powertrain & EV parts at Bangkok, Thailand

Hotline: +91 9049948833 | Email ID: sales@grindmaster.co.in | www.grindmaster.co.in

NANOFINISH | METAL FINISH | DEBURR | ROBOFINISH | ABRASIVES

Description:

Grind Master CEO and R&D head Sameer Kelkar delivered an exciting presentation at ASEAN Automotive Powertrain Summit in BANGKOK last week.

The Finish specification on Modern Part Drawings of Powertrain Parts, DCT parts & EV parts has put New Challenges & we at GRIND MASTER are Proud to have developed Such Microfinishing Technologies to achieve Desired Finish values consistently & at OPTIMUM COST.

The Summit in Thailand was attended by over 200 people from India, Thailand, Malaysia, Vietnam and China. Experts in various subjects affecting Automotive Powertrain delivered talks on Regulatory requirements, technology developments and the way forward. Microfinishing and Superfinishing of high speed rotating parts is a key subject in improving performance - Fuel Efficiency, Noise, Corrosion Resistance. As various new technologies including BEV, Fuel Cell, Hydrogen Combustion, bio fuels compete with each other to replace the conventional Petrol/Diesel Engines, there is a growing importance of Microfinishing which is required as a critical process in any Automotive Powertrain. Our presentation engaged designers and manufacturing engineers to strive to improve the performance with better high reliability finishing.

About Grind Master

Grind Master is a Global Technology Leader in specialized Turnkey Machines for Metal Finishing, Deburring, Microfinishing, Robotics Machines and Abrasives, providing total solutions for surface finishing requirements. Grind Master is the Metal Finishing Expert, offering the widest range of Metal Finishing Machinery for applications ranging across round tubes and bars, square tubes and flat bars, cookware, pots and pans, hardware, to roll grinding. We offer versatile and robust manual machines, as well as fully automatic Special Purpose machines for high volume production. The applications of machines vary from rough grinding to fine finishing. Our machines are used for Decorative Finishing purpose, whether buffing or polishing or finishing, are designed to yield optimum results. We offer a variety of Grinding and Finishing solutions such as: • Centerless Grinding And Polishing Machines • Flat Part Grinding & Polishing Machines • Sheet Metal Polishing And Deburring Machines • Manual Metal Finishing Machines • Special Purpose Metal Finishing Machines • Cookware finishing Machines
